LET'S SAVE THE WORLD TOGETHER

An Interactive Environmental Protection Poster

Yijing Wu (1008360471)

LET'S SAVE THE WORLD TOGETHER

Avoid Plastic Bags
Bring your own reusable shopping bags to reduce plastic waste and prevent pollution in oceans and landfills.

Reduce Car Usage
Choose walking, biking, carpooling, or public transportation to reduce carbon emissions and traffic congestion.

Cut Down on Single-Use Plastics
Replace disposable bottles, straws, and packaging with reusable or biodegradable alternatives.

Plant Trees
Join tree-planting or reforestation programs to improve air quality and provide habitats for wildlife.

Waste Sorting
Sort waste into proper categories to recycle materials and reduce overall environmental pollution.

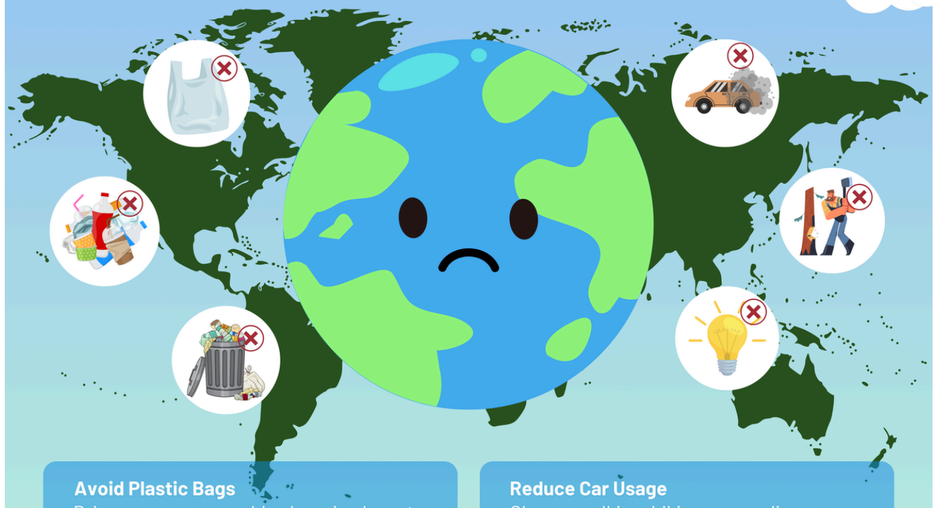

Save Energy
Turn off unused lights and electronics, and switch to energy-efficient LED bulbs.

Interactive Mechanism

- Magnetic cards allow viewers to flip icons
- Transform “harmful behavior” → “eco-friendly action”
- The motion creates a sense of involvement and participation
- Red cross / green check marks provide instant feedback
- A blue info box explains each action in simple, child-friendly language

Target Audiance

- Children & students aged 5–18, and their family members
- Habits and environmental awareness are still developing → easier to guide
- Clear red crosses and green check marks help younger viewers quickly distinguish harmful vs. beneficial actions
- Encourages children to share with parents → creates intergenerational influence

Rationale

- Environmental education should be engaging and hands-on
- This project invites people to stop, touch, and participate
- Change abstract issues to daily actions
- Easy to display in schools and communities

Relevant Alternative Media Theory

- Bypassing mainstream media – Reaches audiences directly in schools and communities, avoiding corporate or government filtering (Eichhorn, 2016)
- Active participation – Audiences become co-creators, contributing to the creation and spread of content (Darder, 2011)
- From advocacy to action – Turns abstract environmental issues into concrete daily practices (Cozen, 2013)
