To create a poster that attracts customers and conveys clear information, I approached the design from multiple angles.

First, I choose to make a poster about a new flower store “Floral Dreams”. To convey this information clearly, I chose a left-right layout, placing the image on one side and the text on the other. This layout make audience easily focus on the key information while maintaining a visually balanced and aesthetically pleasing design.

Secondly, I selected an image of a girl holding a bouquet of flowers for the poster. This image is not only cute and warm but also effectively conveys the theme of the flower shop. The image demonstrates the principles of proximity and continuity, the flowers in the girl's bouquet are close together, forming a cohesive unit, and the elements around her head are perceived as related due to their proximity. This design helps attract the audience's attention and makes the information more cohesive. Moreover, the flowing lines of the girl's hair and body guide the viewer's eyes smoothly from one part of the image to another, enhancing the visual harmony and complementing the soft and warm atmosphere of the flower shop.

For the colors, I chose a warm orange tone, which conveys a sense of warmth, optimism, and sunshine. This color aligns with the cozy and joyful atmosphere of the flower shop. Warm tones not only attract attention but also convey positive emotions. In terms of font design, the shop name "Floral Dreams" is displayed in a large font to catch the customer's eye. Similarly, in the text, "SALE" and "40% " also in large fonts and different color to highlight the promotional information and attract customers further. Additionally,

vertical text on the right side features our store's slogan, "Express your love with our blossoms."

In summary, through layout, image selection, color coordination, and typography, this poster conveys the message of the flower shop's opening, and creates a warm atmosphere that further attracts potential customers. Hope this poster effectively promotes the shop's grand opening and brings in more customers.
